## PROJECTS

---

**BeatSoup:** A clone of the popular social music site SoundCloud, written in Backbone.js with a Ruby on Rails backend. Single-page app with Backbone composite views, making heavy use of AJAX, allowing for a now-playing queue that persists across a user's session. Overrides Backbone.sync to better facilitate error handling. <http://www.beatsoup.me>

**Asteroids.js:** A little browser-based Javascript game utilizing HTML5 Canvas for animation. Extends JS's Array prototype to add functions for 2D vector math. <http://jfbarszcz.com/asteroids>

**ActiveRecord:** A rebuilding of Rails' ActiveRecord using Ruby metaprogramming techniques

## SKILLS

---

Ruby, Rails, Javascript, jQuery, Python (learning), Backbone.js, HTML(5), CSS, Git, SQL, Drupal 6 & 7, TDD

## WORK EXPERIENCE

---

### Web Developer

2013

George Washington University

Washington, DC
